

New Grant from NIH to study speech production

The National Institutes of Health NIDCD has awarded Shri Narayanan (PI) (EE, Ling, CS), Dani Byrd (Co-lead Investigator) (Ling), Krishna Nayak (EE), Sungbok Lee (Ling & EE), and Richard Leahy (EE) an award of \$1,767,992 (May 2005-April 2009) for their research project entitled “Dynamics of Vocal Tract Shaping.” This is a brand new grant taking advantage of the real-time MRI techniques to advance research in speech production.
